<th>Abilities</th>
<th>Abilities</th>
</tr>
</thead>
</table>
| - Development of risk management plan  
- How to communicate the implemented risk control measures  
- Verify the expectations of a risk management champion with relevant experience  
- Form a risk management team based on organisational WSH policy  
- Establish hazard identification methodology for the workplace to identify WSH hazards associated with any work activity or trade  
- Establish risk assessment methodology for the workplace to determine the risk levels of the identified hazards associated with any work activity or trade  
- Establish risk control measures methodology for the workplace to manage the identified risks to a level as low as reasonably practicable  
- Develop a workplace risk management plan to implement the hazard identification, risk assessment, and risk control measures  
- Present the risk management plan to relevant stakeholders for consideration  
- Communicate the identified hazard, risk evaluated, and implemented risk control measures to the person concerned | - Formulate a risk control strategy based on the principles of the Hierarchy of Control  
- Recommend reasonably practical risk control measures based on the risk control strategy and in consultation with relevant stakeholders  
- Formulate the implementation plan, in alignment with organisational WSH policies  
- Communicate the risks and control measures to the relevant stakeholders, in accordance to legal and other requirements  
- Maintain risk assessment documentation in accordance with legal and other requirements |
